

SCHOLAR INFORMATION MANAGEMENT SYSTEM

Course: CSE302

Section: 05

Group - 02

- Junnun Mohamed Karim (2022-1-60-108)
- Md. Yousuf Hozaiifa (2022-1-60-162)

PROJECT OBJECTIVE

- **User Registration and Authentication:**
 1. Allow scholars and administrators to register accounts.
 2. Implement a secure login system to authenticate users.
- **User Profile Management:**
 1. Provide scholars with the ability to create and update their profiles.
 2. Store essential information about scholars, such as their names, contact details, nationality, and university
- **Database Management:**
 1. Design and implement a database schema that efficiently stores and retrieves scholar, research paper, and subject information.
 2. Establish relationships between tables to maintain data integrity.
- **User-Friendly Interface:**
 1. Develop a user-friendly interface for scholars and administrators to interact with the system.
 2. Ensure that the system is intuitive and easy to navigate.

FEATURES

- **Core Functionalities:**
 - **Register User** : Register new Users.
 - **Login**: Easily login as a User or as an Admin.
 - **Login as User:**
 - Show personal information
 - Let User modify their personal information
 - Show User's research paper
 - Add paper
 - Update Paper
 - Delete Paper
 - **Login as Admin:**
 - Do operations on User
 - Add User
 - Update User
 - Delete User
 - Do operations on Paper
 - Add Paper
 - Update Paper
 - Delete Paper
 - Add Subjects
